

*"It (my hearing aid) has given me the ability to hear things that I was unable to hear two years ago. I do not have to strain to hear or ask several times what did they say. I can now hear the words to songs and TV without turning it up so much that it irritates my husband. My children were so excited that I had gotten them because they were beginning to say mom you need hearing aids."*

*"First they did not try to sell me hearing aids without a thorough testing. I was also told my options and how it would help me. They took the time to show me all the choices of hearing aids and what would be the best for my problem. When I go in to have my aids serviced I am pleasantly surprised. I find many times there is no cost because they are under warranty or they furnish the part as a courtesy. They inform me when my warranty will expire and have me come in for a last check. The office staff is at all times helpful and informative. The doctors are first class and will treat you with helpful information and great respect. She made it clear if the hearing aids did not work we would try others. I could not ask for a better guarantee."*

*"I have already recommended the Center to many of my friends and they have gotten their hearing aids from the Center for Audiology. One of my friends was unable to wear them and they took them back without question. Others wear them and are very happy. They also say that they get great service. Thank you so much for your service to the community."*
