

*“I can hear so much better with the hearing aid recommended for me. In a short period of time I could amazingly hear without asking people what they said ten times!”*

*“From the time I went in until I left I was informed about my hearing aid and given all the information I needed to know about it. Every courtesy and patience in explaining what I needed to know, without any pressure or persuasion at all.”*

*“It was a great experience to be able to hear words and sounds, and I would hope this could be possible for anyone.”*
