

*“The professional staff, before testing, spent time determining what my need was, and to gain understanding in realistic results. The instruments provided were personally fitted and programmed to enhance my hearing ability.”*

*“I cannot imagine a more caring staff. The determination and desire to help me, as an individual, was very evident. As questions were asked about care of the hearing aids, I was patiently shown and not referred to a manual. My ability to understand conversations, even in gatherings has greatly improved!”*

*“ABSOLUTELY! I would and have recommended the Center for Audiology. Unsurpassed care and knowledge by a staff enhances an important aspect of daily life - the ability to hear!”*
